Junior software developer with a background in SaaS sales. Passionate about web development processes, learning, and building challenging applications. Previously I worked as a Business Development Representative for a software company and have recently decided to pivot my career and learn how to build software myself. As a recent bootcamp graduate, I'm a quick learner, with strong communication, time management and collaborative skills and I excel in fast-paced environments.

PROJECTS

Yalper
Developed a single page application (SPA) using ReactJS, NodeJS & ExpressJS, which also implements Google Oauth and Cloudinary APIs, to allow users to provide services & regular users to find service providers for their specific needs.
Front-end: ReactJS, Axios, HTML, SASS.
Back-end: NodeJS, ExpressJS, PostgreSQL.

Interview Scheduler
Developed Interview Scheduler - a single page application (SPA) built using ReactJS. This application allows users to book and cancel interviews.
Front-end: ReactJS, HTML, SASS.
Back-end: NodeJS, ExpressJS, PostreSQL.
Testing: Jest, Storybook, Cypress.

Jungle
Fullstack, multi-page, mini e-commerce application that allows browse items, fill their carts and checkout with Stripe. This project was built with the intention of learning Ruby and Ruby on Rails by implementing new features to an existing application.
Front-end: Javascript, HTML, CSS.
Back-end: Ruby, Rails, ActiveRecord, PostgreSQL.

Mapple
Developed Mapple - a multipage, fullstack application that saves and manages maps and map locations with tags for users. Maps are organized by interest and can be edited, organized and favourited.
Front-end: Javascript, Ajax, JQuery, HTML, SASS.
Back-end: NodeJS, ExpressJS, PostreSQL.

Tweeter
Tweeter is a simple, single-page application clone of Twitter. This application was built to practice introductory concepts of SPAs as well as to learn CSS.
Front-end: Javascript, Ajax, JQuery, HTML, CSS.
Back-end: NodeJS, ExpressJS.

SKILLS

Languages: Javascript, Ruby, HTML, CSS.
Frameworks, libraries & environments: NodeJS, ReactJS, Ajax, Axios, Rails, JQuery, Bootstrap, SASS, Cypress, Jest, Mocha & Chai, Storybook.
Systems & Databases: SQL, PostreSQL, Git, ActiveRecord.
